Gleneagles Kuala Lumpur (GKL) celebrated World Physical Therapy Day on 8 September 2017. The focus for this year was to promote being “Active for Life” with some fun challenges/games.

Activities that were included on that day were plank challenge, cup stacking challenge, ball dribbling challenges and movement assessment screening was done. We also had prize gift for the winners for each challenges and door gift for all participant. We also created a video to promote our department. A total of 60 participants consisting of clinical and non-clinical staff, doctors, patients and public took part in our fun filled event.

The WPTD 2017 again created awareness of the importance of being physically active and the role Physiotherapist play to help others achieve it.
